Work Experience

Founding Engineer, dataparts.ai (Early Stage Startup) – Atlanta, GA December 2024 – Present

- Led frontend architecture across 4 repos from Figma to production, setting engineering patterns adopted team-wide
- Developed an AI Assistant using React and TypeScript with real-time SSE updates to process HR and M&A workflows
- Implemented drag-and-drop canvas workspace with Google Drive Picker, streamlining content attachment workflows
- Built a modular authentication platform using React, TypeScript, TanStack, reused across 4+ tenant applications
- Standardized a shared design system (ShadCN UI, Tailwind CSS, Radix UI), and documented UX/accessibility guidelines
- Configured and maintained CI/build and deployment pipelines for 2 environments using Cloudflare Workers

Full Stack Engineer, Curajoy (Non-Profit, Part-Time) – Phoenix, AZ October 2024 – March 2025

- Built an interactive wellness calendar UI in Next.js, TypeScript and Figma enabling users to track daily activities
- Implemented reward payouts and invites as part of a distributed message queue system using Node, Express, BullMQ

Frontend Engineer, One Community Global (Non-Profit, Part-Time) – Philadelphia, PA June 2024 – October 2024

- Developed volunteer analytics dashboard using React and D3.js for 230+ users displaying engagement metrics
- Implemented unit and integration tests using Jest and RTL, reducing QA cycle time from 2 days to 9 hours

Frontend Engineer Intern, VanEck – New York, NY June 2023 – August 2023

- Developed a DeFi Asset Tokenization platform using React and Web3.js with projected cost savings of \$500K annually
- Optimized website performance through Redux state management, reducing dashboard load time from 2.4s to 800ms
- Developed Ethereum transaction flows by integrating multi-signature approvals via MetaMask and 8+ REST APIs
- Built responsive UI components using Material-UI, CSS and React hooks, implementing fluid animations and layouts

Frontend Engineer, Tata Consultancy Services (Amex) – Chennai, India August 2021 – August 2022

- Migrated Amex AtWork platform from jQuery to React, improving scalability and UX for 5,200+ DAUs across 41 clients
- Boosted client retention by 12% by modernizing core UI components tied to \$48M+ in daily transaction workflows
- Delivered 22+ React UI components for financial dashboards integrating REST APIs and achieving 92% user satisfaction

Skills

Languages: JavaScript, TypeScript, Python, HTML, CSS

Libraries & Frameworks: React, Tailwind CSS, Next.js, Redux, Zustand, Node.js, SCSS, Jest, React Testing Library (RTL)

Databases & Cloud: PostgreSQL, MongoDB, Redis, Firebase, AWS, Cloudflare Workers

Tools: Git, Figma, Docker, CI/CD (GitHub Actions)

Projects

AI Agent Platform [Project Link](#)

- Built an AI Agent platform using Next.js, TypeScript, Convex backend and Clerk auth to manage secure user sessions
- Integrated LangChain with YouTube, Google Books, and Wikipedia APIs to enable info extraction and summarization
- Connected IBM WxTools SDK with LangGraph to create an agent-tool execution graph for AI interaction patterns

Dm.ai - Instagram Marketing SaaS [Project Link](#)

- Developed an Instagram marketing automation SaaS using Next.js, TypeScript, PostgreSQL, and Meta webhooks; onboarded 93 users for content scheduling and engagement tracking
- Integrated OpenAI to power smart, context-aware Instagram responses with average response generation time < 4s

Education

Drexel University – MS in Computer Science, GPA : 3.7/4.0 March 2024

Anna University – BE in Electronics and Communication Engineering April 2021
